Liz-

The title for the first timeline I sent you this morning should be named "Gold King Mine Historical Timeline". Let me know if you have any questions. Thanks for you help.

Hi Chris-

Thanks for sending along the materials. My day is open so give me a ring after you send the second timeline and we can talk. Will we need someone for mapping support to show the watershed? I understand the START contractors are handling most of the work.

I'll get started on the first timeline.

617-918-1158.

Thanks

Liz

Good morning Liz-

Attached is a timeline for the Gold King Mine. We are hoping you can assist in making a graphic that illustrates the timeline. The timeline includes references the American Tunnel which is relevant to the time line as prior to it being plugged there was no observed discharges from the Gold King. We will also need to create another timeline related to EPA's notification of the incident. I will be sending more on it shortly. Give me a call if you have any questions. Thanks for your help.
